

React Native Developer

Experience req. 3 - 5 years

About us

MoneyHop is a London based full-stack cross-border neo banking solution for Indian millennials that enables them to Send, Spend, and Collect money conveniently and economically across the globe. Being a full-fledged money changer regulated by the RBI, the company provides a unified interface through which users can seamlessly transfer money between multiple accounts at a near IBR rate. In short, MoneyHOP aims to simplify the international banking procedures and help India go global. Its state-of-the-art, tech-centric, customer-focused solutions are designed explicitly to build the next generation digital banking platform for an user-intuitive and economical currency exchange experience.

In short,

Zero Transfer Charges+Best-in-class exchange rates+Real-time currency exchange=moneyHOP

Mission

- To solve roadblocks in cross-border payments through tech-oriented approaches.
- To make banking smarter, faster, better.
- To provide a unified platform that lets Indian millennials Send, Spend, and Collect money anytime, anywhere!
- To leverage an accessible, flexible, and fastest gateway that makes International money transfer cheap, convenient, and transparent with competitive exchange rates and no mark-up fees.
- To make banking paperless, presence less, and cashless.

Vision

Our vision is to revolutionise banking for millennials in India and globally. We work towards making international money transfer seamless and convenient for millennials through our experience-rich, digital, and mobile-first banking solutions. In our journey, we aim to harness the power of premium technologies such as Artificial Intelligence to empower Indian millennials with technology-first cross-border banking solutions. Ultimately, we aim to become an embodiment of financial services where consumers' financial needs can be addressed from a single touchpoint.

About Individual

Looking for an enthusiastic individual who is passionate about technology and has preferably worked with a start-up in the past. An ideal candidate for this role would be willing to take responsibility for their work and can manage their time effectively. More skills which would qualify them for this role are listed below.

Working as a React Native Developer at MoneyHop, you will:

- Perform all phases of software engineering including requirements analysis, application design, architecture design, code development, and testing.
- Build pixel-perfect, buttery smooth UIs across platforms.
- Leverage native APIs for deep integrations with both platforms.
- Diagnose and fix bugs and performance bottlenecks for performance that feels native.
- Reach out to the open-source community to encourage and help implement mission-critical software fixes—React Native moves fast and often breaks things.
- Maintain code and write automated tests to ensure the product is of the highest quality.
- Review code and provide feedback related to best practices and improving performance.

Who Are We Looking For Exactly?

- A React Native developer with 3+yr of experience with expertise on multiple phases of a project lifecycle from concept development to solutions design, implementation, optimization, and support.
- Good Experience with React Js, React Native, JavaScript including DOM manipulation, and the JavaScript object model.
- Knowledge of REACT tools including React.js, Webpack, Enzyme, Redux, and Flux.
- Good understanding of Object-oriented programming.
- Ability to write well-documented, clean Javascript code.
- Rock-solid at working with third-party dependencies and debugging dependency conflicts.
- Familiarity with native build tools, like XCode, Gradle, Android Studio, or IntelliJ.
- Understanding of REST APIs, the document request model, and offline storage.
- Experience with Native Mobile app releases on App store and google play store. (A plus)
- Experience with cloud technologies like AWS is also a plus.
- Must have excellent communication and interpersonal skills.
- Should have a Master's Degree /Bachelor's (BS) in computer science, Software Engineering, IT, Technology Management, or related degrees.

Our Tech Stack

Our Products

HOPApp

It is a full-stack, cross-border, neo banking application that enables smarter and faster banking. It acts as the unified interface that lets users Send, Spend and Collect seamlessly by using one app + card. As a customer-centric technology-oriented banking solution, HOPApp fosters the idea of “One Global Account–One Global Card” by amalgamating the intricacies of Debit+ Credit+ FX cards that enable users to perform every single banking operation in one single app.

HOPRemit

It is an instantaneous, cost-effective, user-intuitive, and contactless international remittance service that is tailor-made to better serve the Indian millennials. It provides customers with complete transparency and significantly reduces the total transaction costs of sending money abroad. Being an RBI-regulated entity, the completely digital HOPRemit represents the perfect concoction of a fintech’s agility and the security observed in a bank.

At moneyHOP, we provide digital cross-border financial services via our primary products:

HOPRemit

A web-portal providing fast, secure, cost-effective, and paperless cross-border remittances.

HOP App + Card

Is a Mobile-first digital banking application plus a card. With HOP’s ‘one global card-one global account’ users can Save, Invest, Borrow, and Spend..

HOP Pay

Enabling 50M SMEs in India to collect and pay for imports and exports in an Instant and cost-effective manner.
